11 12 13 Feb. 2027

HITEX Exhibition Centre, Hyderabad
Telangana India

Hyderabad's Precast Moment

Telangana is running the largest, most precast-intensive construction cycle any Indian state has taken on at once. India Prefab & Precast Expo is where the companies building it meet the companies capable of it.

Modelled on Hyderabad Metro's Precast Segmental Construction - 85% Precast at India's Largest Urban Precast Yards

ABOUT THE 4TH EDITION

FROM DELHI'S STEEL HALLS TO HYDERABAD'S PRECAST YARDS

For three editions, India Prefab Expo brought together the country's steel prefab, modular and offsite construction industry in New Delhi. For its 4th edition, the event travels to Hyderabad - and for the first time, precast concrete technology moves to the centre of the show.

Telangana is in the middle of the largest, most precast-intensive construction cycle any Indian state has taken on at once: a 340 km Regional Ring Road under active construction, a second metro rail phase awaiting central clearance, a ₹64,000 crore pharma megacity taking shape at Mucherla, and a data centre investment pipeline racing past USD 10 - 20 billion. Every one of these programmes runs faster, and better, on precast and offsite construction.

Infinity Expo brings India Prefab & Precast Expo to Hyderabad on 11-12-13 February 2027 - where policymakers, developers, EPC leaders and precast technologists do business on one floor.

THE REGIONAL CASE

WHY HYDERABAD WHY PRECAST. WHY NOW.

Hyderabad didn't need convincing about precast. It already built one of India's largest precast programmes - and it's about to build a second, much bigger one.

85%

of Hyderabad Metro's Viaducts & Stations Built Precast

A PRECAST TRACK RECORD MOST CITIES DON'T HAVE

Hyderabad Metro Rail is one of the Largest Precast Infrastructure Programmes ever Executed in India, built using precast, pre-stressed segmental technology, cast at what remain India's largest urban precast yards - a 72-acre facility at Uppal and a 62-Acre facility at Qutubullapur. That capability doesn't disappear once a phase opens; it becomes the foundation for what's next. Metro Phase 2 - 76.4 km Across Five Corridors, a ₹24,269 Crore project cleared by the Telangana Cabinet and now before the Centre for final approval - will put those yards, and a fresh wave of precast contractors and suppliers, back to work.

340KM

Regional Ring Road NHAI Bharatmala Pariyojana

A RING ROAD THAT RUNS ON BRIDGES AND BOX GIRDERS

The Hyderabad Regional Ring Road is one of the Largest Greenfield Expressway Programmed in the country, with its northern stretch targeted for completion around 2026 - 27 and the southern stretch to follow by 2027 - 28. Expressways at this scale mean flyovers, grade separators and box-girder bridges at a pace conventional cast-in-situ construction struggles to match - precisely the segment where precast and segmental construction earn their keep.

₹64,000CR

Hyderabad Pharma City Mucherla

THE WORLD'S LARGEST INTEGRATED PHARMA CITY IS RISING

Hyderabad Pharma City - The World's Largest Integrated Pharma Park, Creating 5.6+ Lakh jobs by 2028. With cleanrooms, API plants & cold-chain needs, it's a Huge Opportunity for precast & prefab construction. Add to that Genome Valley - home to 200+ life-sciences companies, making 1/3rd of the world's vaccines. Now expanding as Genome Valley 2.0 with Green Pharma City & 10 Pharma Villages under Telangana's Life Sciences Policy 2026-30.

5GW

Telangana Data Centre Capacity Target By 2030

HYDERABAD'S DATA CENTRE BOOM NEEDS SPEED ABOVE ALL ELSE

Telangana's Data Centre Pipeline is worth USD 10-20 Billion. Hyderabad is now ranked 27th globally for capacity & 19th for future pipeline (Knight Frank 2026). With mega investments from Microsoft (₹15,000 Cr), Amazon, CtrlS (612 MW campus), NTT DATA & Neysa (₹10,500 Cr, 400 MW) and Airtel Nxtra, hyperscale growth is booming. Since data centres are all about speed-to-market, global players now prefer precast walls & modular MEP over conventional construction.

42-ACRE

Industry 4.0 Precast Park South India

THE SUPPLY BASE IS ALREADY FORMING IN THE SOUTH

South India isn't just where precast demand is growing - it's where serious precast manufacturing capital has already landed. KEF Infra's 42-acre offsite manufacturing park in Krishnagiri, Tamil Nadu, with robotics-driven precast, sandwich-wall and modular MEP production lines, is proof that global-scale precast manufacturing is viable in the region. Hyderabad, at the centre of Telangana's "Telangana Rising 2047" ambition to build a \$1 trillion state economy by 2035, is positioned to become the demand-side hub this Southern precast supply base has been waiting for.

\$14.79BN

India's Precast Concrete Market by FY2033

THE NUMBERS BEHIND THE MOMENT

India's Precast Concrete Market is Projected to grow from USD 7.31 billion in FY2026 to USD 14.79 billion by FY2033 - a 9.2% CAGR (Markets and Data). Telangana's infrastructure, pharma and data-centre pipelines alone represent a meaningful share of where that growth has to be built. India Prefab & Precast Expo 2027 is where the companies positioned to capture it meet the people commissioning it.

EXHIBITION SCOPE

PRECAST CONCRETE TECHNOLOGIES

Retained and expanded from the 3rd edition, with Precast Concrete Technologies Elevated to a headline Category for Hyderabad.

01

Precast Wall Panels (Solid, Sandwich Hollow-core) & Structural Components

High-performance Wall Systems & Structural Elements for Modern Buildings.

02

Precast Urban Infrastructure Elements (Manholes, Drains Kerbs, Boundary Walls)

Reliable Elements for Smarter & Cleaner Cities.

03

Reinforcement, Connection & Structural Fastening Systems

Stronger Connections for Safer Structures.

04

Precast Cleanroom Pharma & Data-centre Ready Modular Panels

Hygienic, High-precision & Performance Panels for Critical Environments.

05

Automation, Robotics, IoT & BIM for Precast Production & QC

Smart Technologies for Higher Quality and Efficiency.

06

Precast Segmental Bridge & Metro Viaduct Systems Box Girders

Efficient & Durable Solutions for Bridges, Metros & Urban Infrastructure.

07

Precast Slabs, Beams, Columns Staircases, Balconies

Versatile Elements for Residential, Commercial & Industrial Projects.

08

Moulds & Formwork - Steel, Modular Magnetic, Custom Systems

Innovative Formwork & Mould Solutions for Higher Productivity.

09

Precast Production Machinery & Complete Plant Setup

Batching, Mixing, Tilting & Handling Systems. Complete Plant for Efficient Production.

10

Precast Logistics, Erection & Installation Systems

Cranes, Transporters & Erection Equipment for Safe & Fast On-site Assembly.

11

Waterproofing, Sealants, Grouts & Surface Protection Chemicals

Durable Solutions for Joint Sealing, Protection & Long-life Precast Performance.

12

Turnkey Precast EPC & Modular Housing Solution Providers

End-to-end Solutions for Faster Project Delivery.

PRE-ENGINEERED BUILDINGS

Primary & secondary framing, warehouses & industrial sheds, data-centre shells, pharma & cleanroom buildings, airports & hangars, commercial/residential structures.

STRUCTURAL STEEL FABRICATIONS

Steel bridges, tunnelling systems, heavy fabrication, metro & rail infrastructure, oil & gas structures.

MODULAR SOLUTIONS

Porta cabins, liftable cabins, modular housing systems, bathroom & MEP pods.

PRE-FABRICATED STRUCTURES

Primary & secondary framing, warehouses & industrial sheds, data-centre shells, pharma & cleanroom buildings, airports & hangars, commercial/residential structures.

ROOF & WALL PANELS

Metal roofing & cladding, insulated & sandwich panels, steel deck profiles, purlins, C&Z sections, flashings & gutters.

LIGHT GAUGE STEEL & SANDWICH PANELS

Prefab schools, housing & villas, PUF, EPS, rock wool & glass wool panel systems.

WHO YOU'LL MEET

The specific buyers driving South India's precast demand - not a generalist trade-show crowd.

Infrastructure & Government

TSIIC, HMDA, HMRL, NHAI/RRR Project Teams, PWD, RERA, TS-IPASS & Smart-city Officials.

Pharma, Life Sciences & Industrial Developers

Hyderabad Pharma City & Genome Valley Companies, CDMOs, CROs, Pharma EPC & Cleanroom Contractors, SEZ Developers.

Data Centre & Tech Infrastructure

Hyperscale & Colocation Developers, GCC Real-Estate Teams, MEP & Modular Infrastructure Providers.

Real Estate, EPC & Construction

Residential, Commercial & Industrial Developers, EPC/turnkey Contractors, Builders, PPP Operators.

Architects, Engineers & Consultants

Structural & Civil Consultants, Precast/Modular Design Specialists, BIM Studios, Urban Planners.

Manufacturers, Suppliers & Investors

Precast, PEB & Prefab Component Makers, Admixture/Formwork Suppliers, PE & Infra Investors.

Academia & Sustainability

Civil Engineering Faculty & Researchers, LEED/GRIHA/IGBC Professionals, ESG Advisors.

Hyper-Local Buyers. Not National Noise.

Seven Buyer Communities, Curated Around One Region's Construction Pipeline - Not a National Generalist Audience.

WHY PARTICIPATE

Eight reasons this edition is different from the last three.

01

Meet the Region Commissioning The Work

Engage face-to-face with HMRL, NHAI/RRR teams, TSIIC and the EPC/developer community behind Telangana's infrastructure, pharma and data-centre pipeline.

02

Showcase Capability Where it's Proven, Not Theoretical

Hyderabad's own metro programme is India's benchmark precast project - presenting here carries credibility no other city's expo offers.

03

Launch and Demonstrate Live

Present new precast, modular and prefab products directly to specifying architects, structural engineers and procurement decision-makers.

04

Learn and Benchmark

A co-located conference puts government, EPC and precast technologists on one stage to debate what a world-class Southern corridor requires.

05

Get in Early on a Demand Curve, not a Mature Market

Hyderabad's precast and data-centre-linked construction wave is in its build-up phase - be remembered before RFPs go out.

06

Access South India's Precast Manufacturing Corridor

Connect with the manufacturing base forming across Telangana, Tamil Nadu, Karnataka and Andhra Pradesh, and the investors backing it.

07

Build Your Pipeline Against a \$1 Trillion Ambition

Position your brand against Telangana Rising 2047 and the multi-decade infrastructure & industrial spend it implies.

08

One Event Multiple Verticals

Precast, Prefab/PEB and Bridge & Tunnel content co-located - reach infrastructure, industrial, pharma and data-centre buyers under one roof.
